Sai Moksha Naimisha Namburu

Hyderabad, India • saimoksha.04@gmail.com • +91 91003 86917 • linkedin.com/in/saimokshanaimisha • github.com/Moksh1704

Computer Science graduate with hands-on experience in backend development, REST APIs, data processing and full-stack applications. Skilled in Python, TypeScript, FastAPI, PostgreSQL and REST APIs, with experience building data ingestion and retrieval pipelines, debugging applications and developing backend components.

Education

B.Tech (Honors) – Computer Science, Andhra University College of Engineering | 2022–2026 | CGPA: 8.70

Technical Skills

Languages: Python, JavaScript, TypeScript, Java

Frontend: React, Next.js, React Native, Tailwind CSS

Backend: FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub, Google Cloud, VS Code, Docker, Linux

Data & AI: Data Processing, RAG, FAISS, LLMs

Experience

Data Analytics Intern — Punjab National Bank (PNB) | Dec 2025 – Jan 2026

- Developed information retrieval and document processing workflows for internal banking use cases using Python, FastAPI, and vector search techniques.
- Processed large volumes of unstructured banking data, building embedding and indexing workflows for efficient document retrieval in an enterprise environment.

Web Developer Intern — Viral Bug Digital Marketing | Jun 2025 – Aug 2025

- Maintained and enhanced client-facing TypeScript websites, implementing feature updates and performance improvements based on business requirements.
- Debugged and resolved cross-browser compatibility issues, improving website reliability, accessibility, and consistent rendering across environments.

Projects

Banking News Intelligence System — Python, FastAPI, FAISS, RAG

- Engineered a backend system for processing and querying large collections of banking documents using data ingestion, chunking, embedding, and semantic retrieval pipelines.
- Implemented FastAPI REST APIs and integrated vector search with LLM-based processing for context-aware responses.

UniVerse — Campus Social Mobile Application — React Native, FastAPI, PostgreSQL

- Created a campus application with attendance, timetables, announcements, events, and communication modules.
- Designed backend APIs, database schemas, authentication, and mobile-backend integrations using FastAPI and PostgreSQL.

Personal AI Career Assistant — Python, FastAPI

- Developed a backend application for resume parsing, ATS scoring, job tracking, and opportunity matching.
- Implemented APIs and custom scoring logic to extract candidate information and rank relevant job opportunities.

Certifications

- Completed Google Cloud Generative AI and Cloud Computing learning paths (2024), covering LLMs, Prompt Engineering, Vertex AI, Gemini and cloud infrastructure.
